

What We're All About

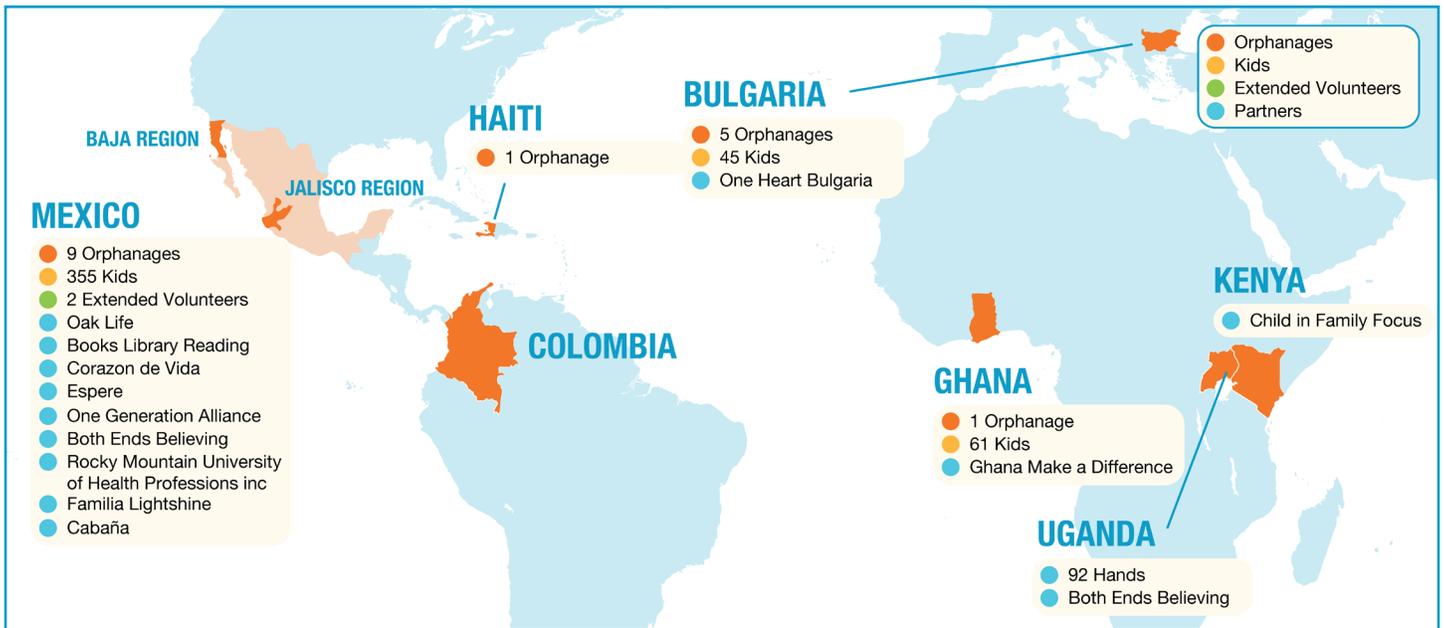

A Child's Hope Foundation exists to break the cycle of poverty and trauma for orphaned and vulnerable children. Children in unsafe conditions or who have been deserted need a safe place to be (often orphanages) while efforts are made to discover ideal options for that child, such as family reunification, foster care, adoption, or otherwise. Until the need for orphanages becomes obsolete, we are committed to serving the children who live there by helping them heal, overcome educational and social deficits, and gain the skills needed to thrive as healthy adults.

We have been lifting orphans from surviving to thriving for 20 years. Because of corruption in so many orphanages, people often don't feel confident in donating because they question if their investment would truly help children. A Child's Hope has developed our Certification Program to validate the effectiveness of the orphanage leadership, ensuring that the homes we evaluate are safe and effective at providing a future for children. Our local staff coaches and reassesses the orphanage effectiveness multiple times a year, helping them create an Improvement Roadmap which serves as the prioritization list for donations.

We partner with other organizations to provide Child Advancement Programs like therapists, tutors, mentors and caregivers for the kids. Using our "Thrive Assessment" based on the United Nations Rights of a Child, we do the work to ensure that the homes we work with are truly safe places with leadership focused on the well-being of the children.

Since our beginning we've hosted over 9,000 volunteers on 211 service trips to orphanages in Mexico, Ghana, Bethlehem, and Haiti (as of August 31, 2022). On service trips, volunteers do construction and other service projects in the mornings, improving the family-style orphanages and their communities. They also play hard with the kids in the afternoons, bringing fun and joy, and letting the kids know there are people who care about them.

In addition to our nine orphanage partners in Mexico and one in Haiti, we've recently implemented partnerships to help orphans in 17 orphanage homes across Bulgaria, Kenya, Ghana, and Uganda. We're currently developing opportunities in Colombia, Peru, Bethlehem, and more regions in Mexico. As we expand rapidly, we've set a goal to fundraise \$3.1 million in this fiscal year, which is almost twice the amount we raised last year. With your help, we can continue to expand to ensure that there are safe places for all children as they begin the path toward stable families and a stable future.

100% of all donations go directly to helping the kids. Private donors cover all of our overhead (even credit card fees!) so you can rest assured that every penny you contribute will directly benefit the orphanages, and most importantly, the kids we serve.
